DETAILED ACTION

Allowable Subject Matter

1. Claims 1-5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

None of the prior art teaches or suggests the recited magnetically activated optoelectronic switch including receiving/storing and selectively accessing electromagnetic radiation signals and storage means which acts to selectively deliver selected signals for signal processing.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is labelled as a magnetically activated optoelectronic switch, however there is no recited switch mechanism or means recited in the body of the claim (i.e. after the word

Art Unit: 2874

"comprising") which would enable switching to be performed. Also, it is substantially unclear as to how any single switch means would enable the wide variety of recited signals (i.e. electromagnetic, magnetic and U.V or visible wavelengths) to be switched/stored. Dependent claims 2-5 are also rejected as being inclusive of rejected claim 1.

A copy of PTO-1449 is also included in this office actions.
